

Security

SSG Group is a leading security company specialized in providing comprehensive and customized solutions for the protection of individuals, properties, and assets. With extensive experience and an extensive portfolio of services, we strive to provide our clients with the security they need to conduct their business worry-free.

Our team consists in professionals with exceptional training in security and extensive practical experience in delivering effective security solutions. With a proactive and client-focused approach, we are always ready to identify and manage potential risks before they escalate into security issues.

Our services include physical guarding and protection, video surveillance and alarm monitoring, mobile patrols, security consulting, and much more. We strive to be our customers' trusted partner, offering them customized solutions tailored to their specific needs.

No matter the size or complexity of the project, we are committed to providing the highest quality of service and ensuring that our partners feel safe and protected in any situation. We are committed to maintaining the highest standards of professionalism, integrity and efficiency in all aspects of our work.

At SSG Group, the client's safety and security represents our mission.

Wherever and whenever!

Professional solutions in our field of activity are based on competences obtained in the 20 years of experience and continuous learning.

Concepts and techniques such as "Security Circles", "4 Eyes Principle", "Psychological Profiling", "Whistle-blowing", and "Codes of Good Practice", are at the basis of SSG Group's activity.

Each project is approached by:

- Knowing customers' needs and risks.
- Prevention (main activity for ensuring security).
- Counteraction (while adhering to functional and budgetary constraints).

Another element that we pay close attention to is compliance with relevant standards.

For SSG Group, continuous improvement is not a stereotype presentations but a Priority. This commitment is reflected in SSG Group's allocation of *Key Account Managers* for key or strategic clients.

In this regard, we can take over any type of facility anywhere in the country according to the performance standards of our clients.

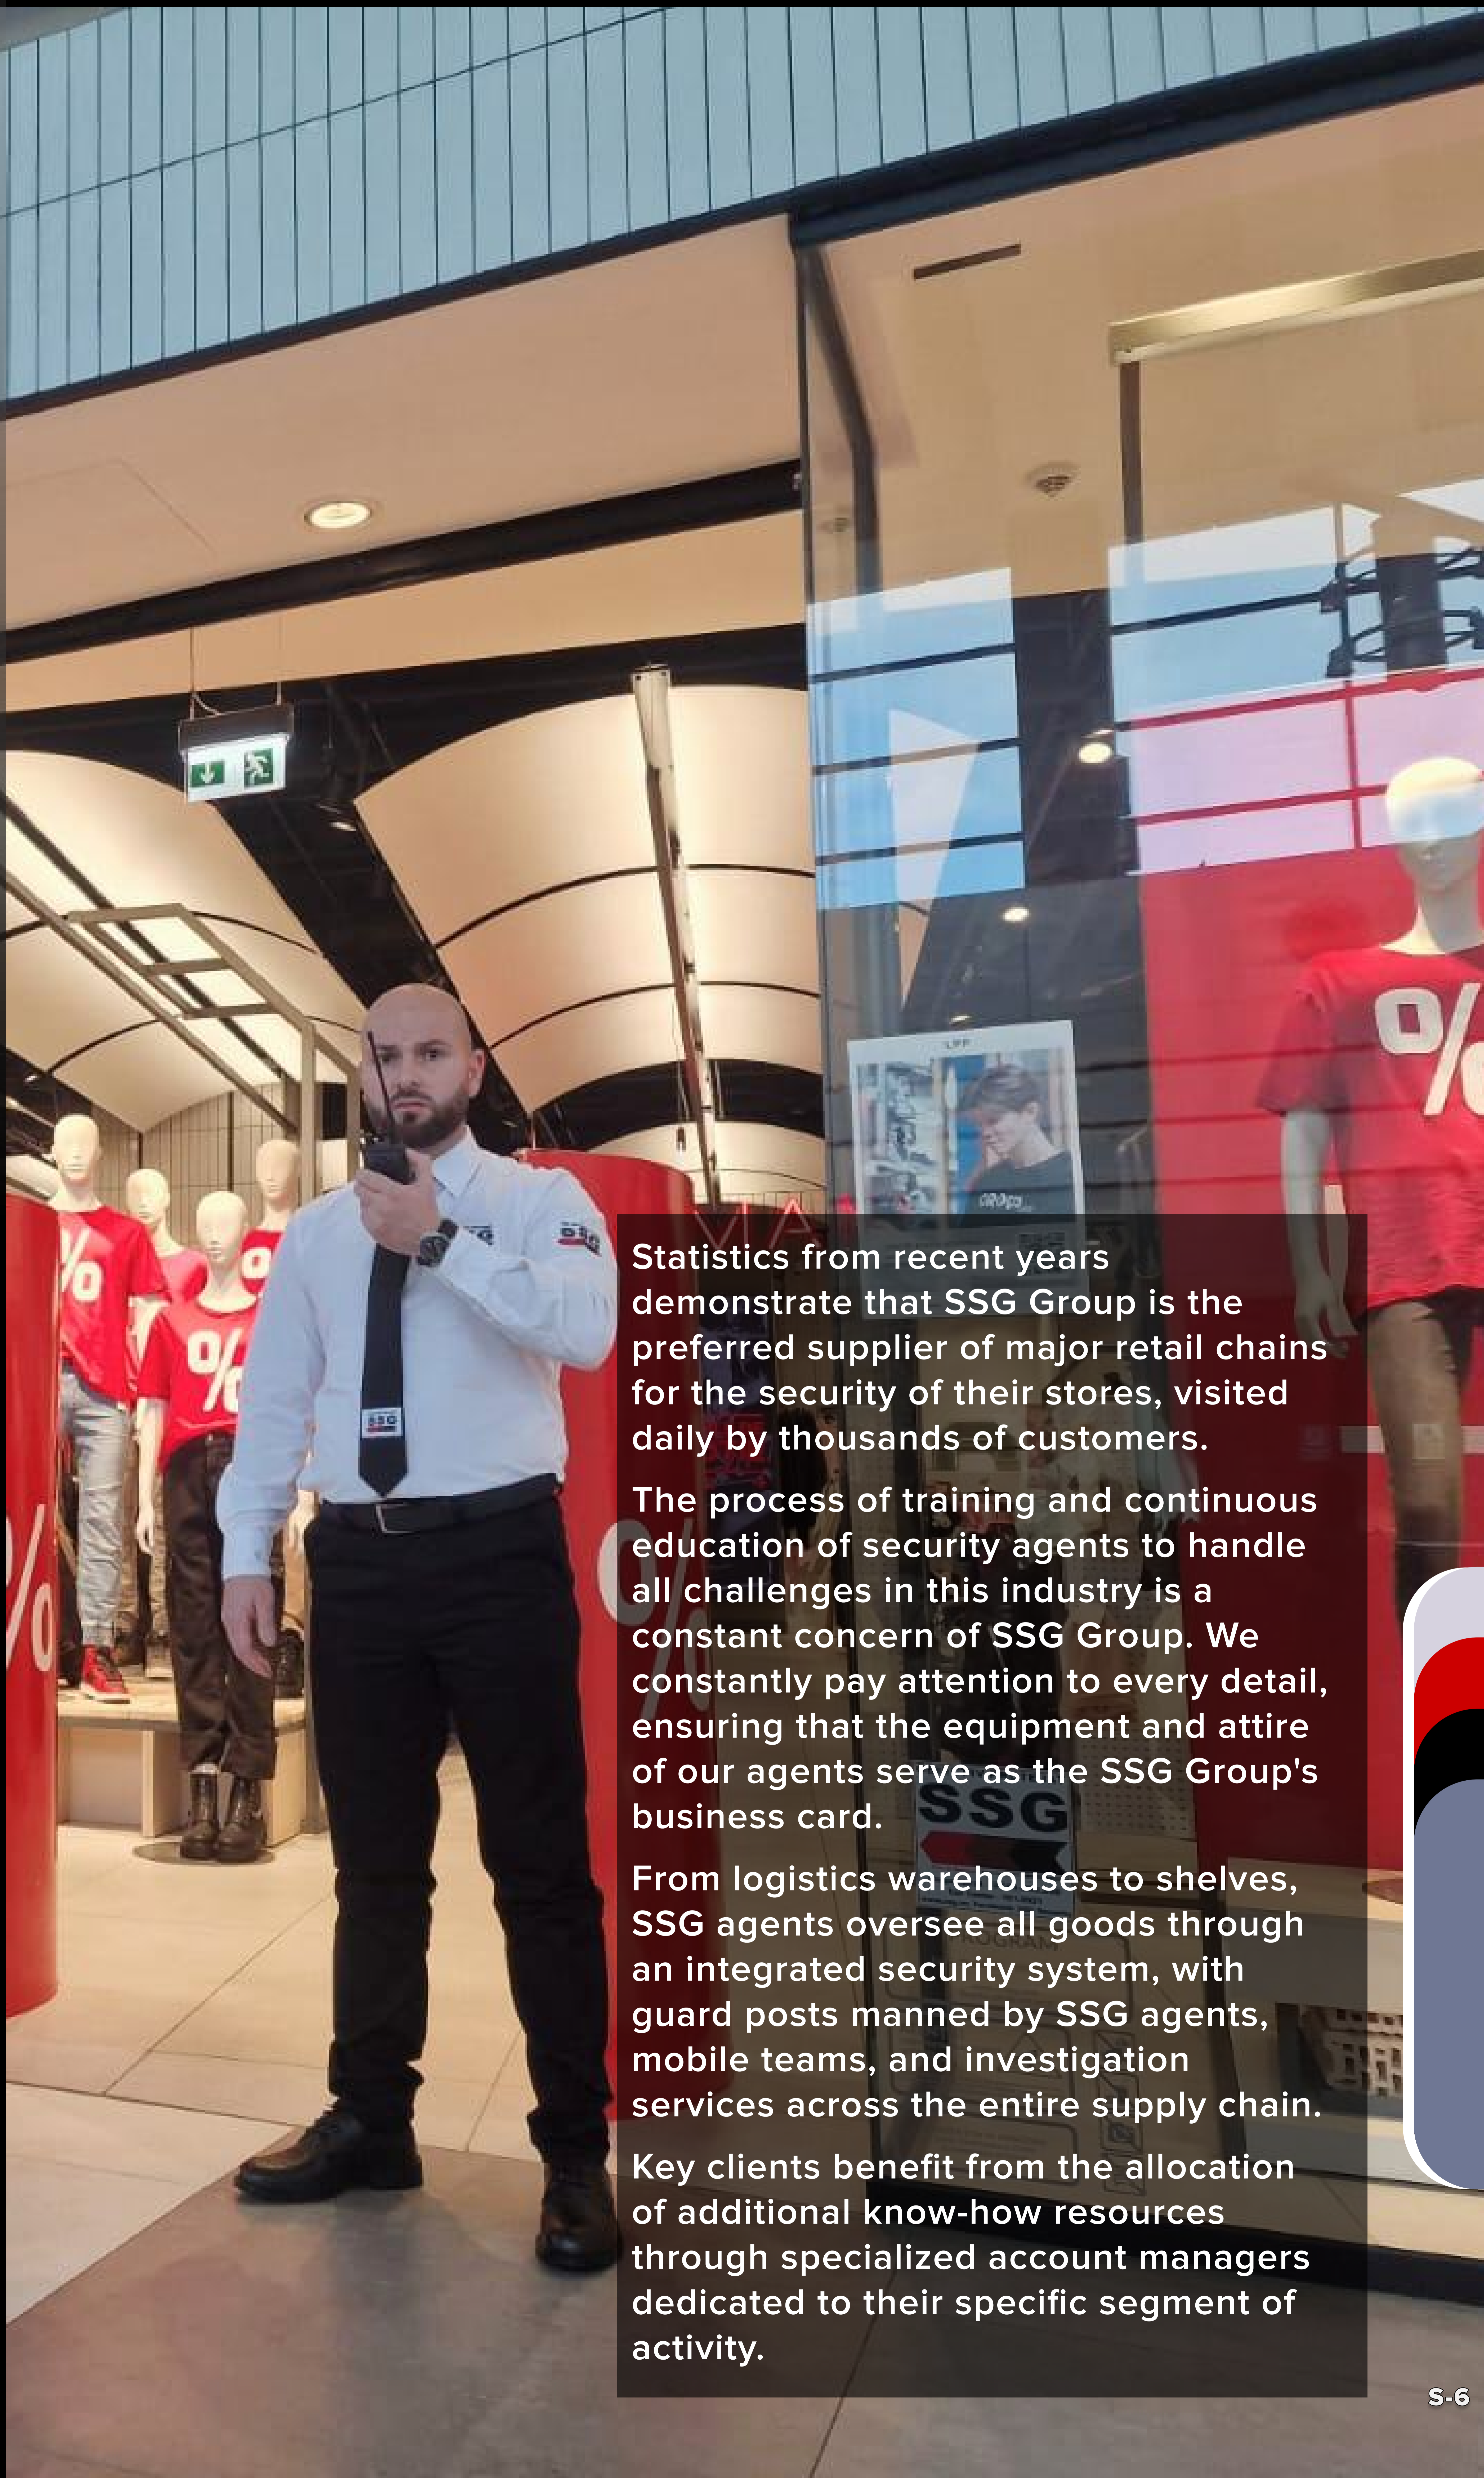

We use a range of HR tools and policies and the steps are simple:

- Ensuring human resources (through recruitment and selection according to SSG Group performance criteria).
- Proper equipment and specific training of agents for each position.
- Security agents' loyalty and retention.

Another SSG Group priority is career and performance management issues. In this respect, in order to achieve even the most ambitious objectives of SSG Group, we considered it appropriate to classify the missions into three categories:

- A - top missions, with a high complexity level.
- B - standard missions.
- C - missions with a low complexity level.

RETAIL

Statistics from recent years demonstrate that SSG Group is the preferred supplier of major retail chains for the security of their stores, visited daily by thousands of customers.

The process of training and continuous education of security agents to handle all challenges in this industry is a constant concern of SSG Group. We constantly pay attention to every detail, ensuring that the equipment and attire of our agents serve as the SSG Group's business card.

From logistics warehouses to shelves, SSG agents oversee all goods through an integrated security system, with guard posts manned by SSG agents, mobile teams, and investigation services across the entire supply chain.

Key clients benefit from the allocation of additional know-how resources through specialized account managers dedicated to their specific segment of activity.

INDUSTRIAL

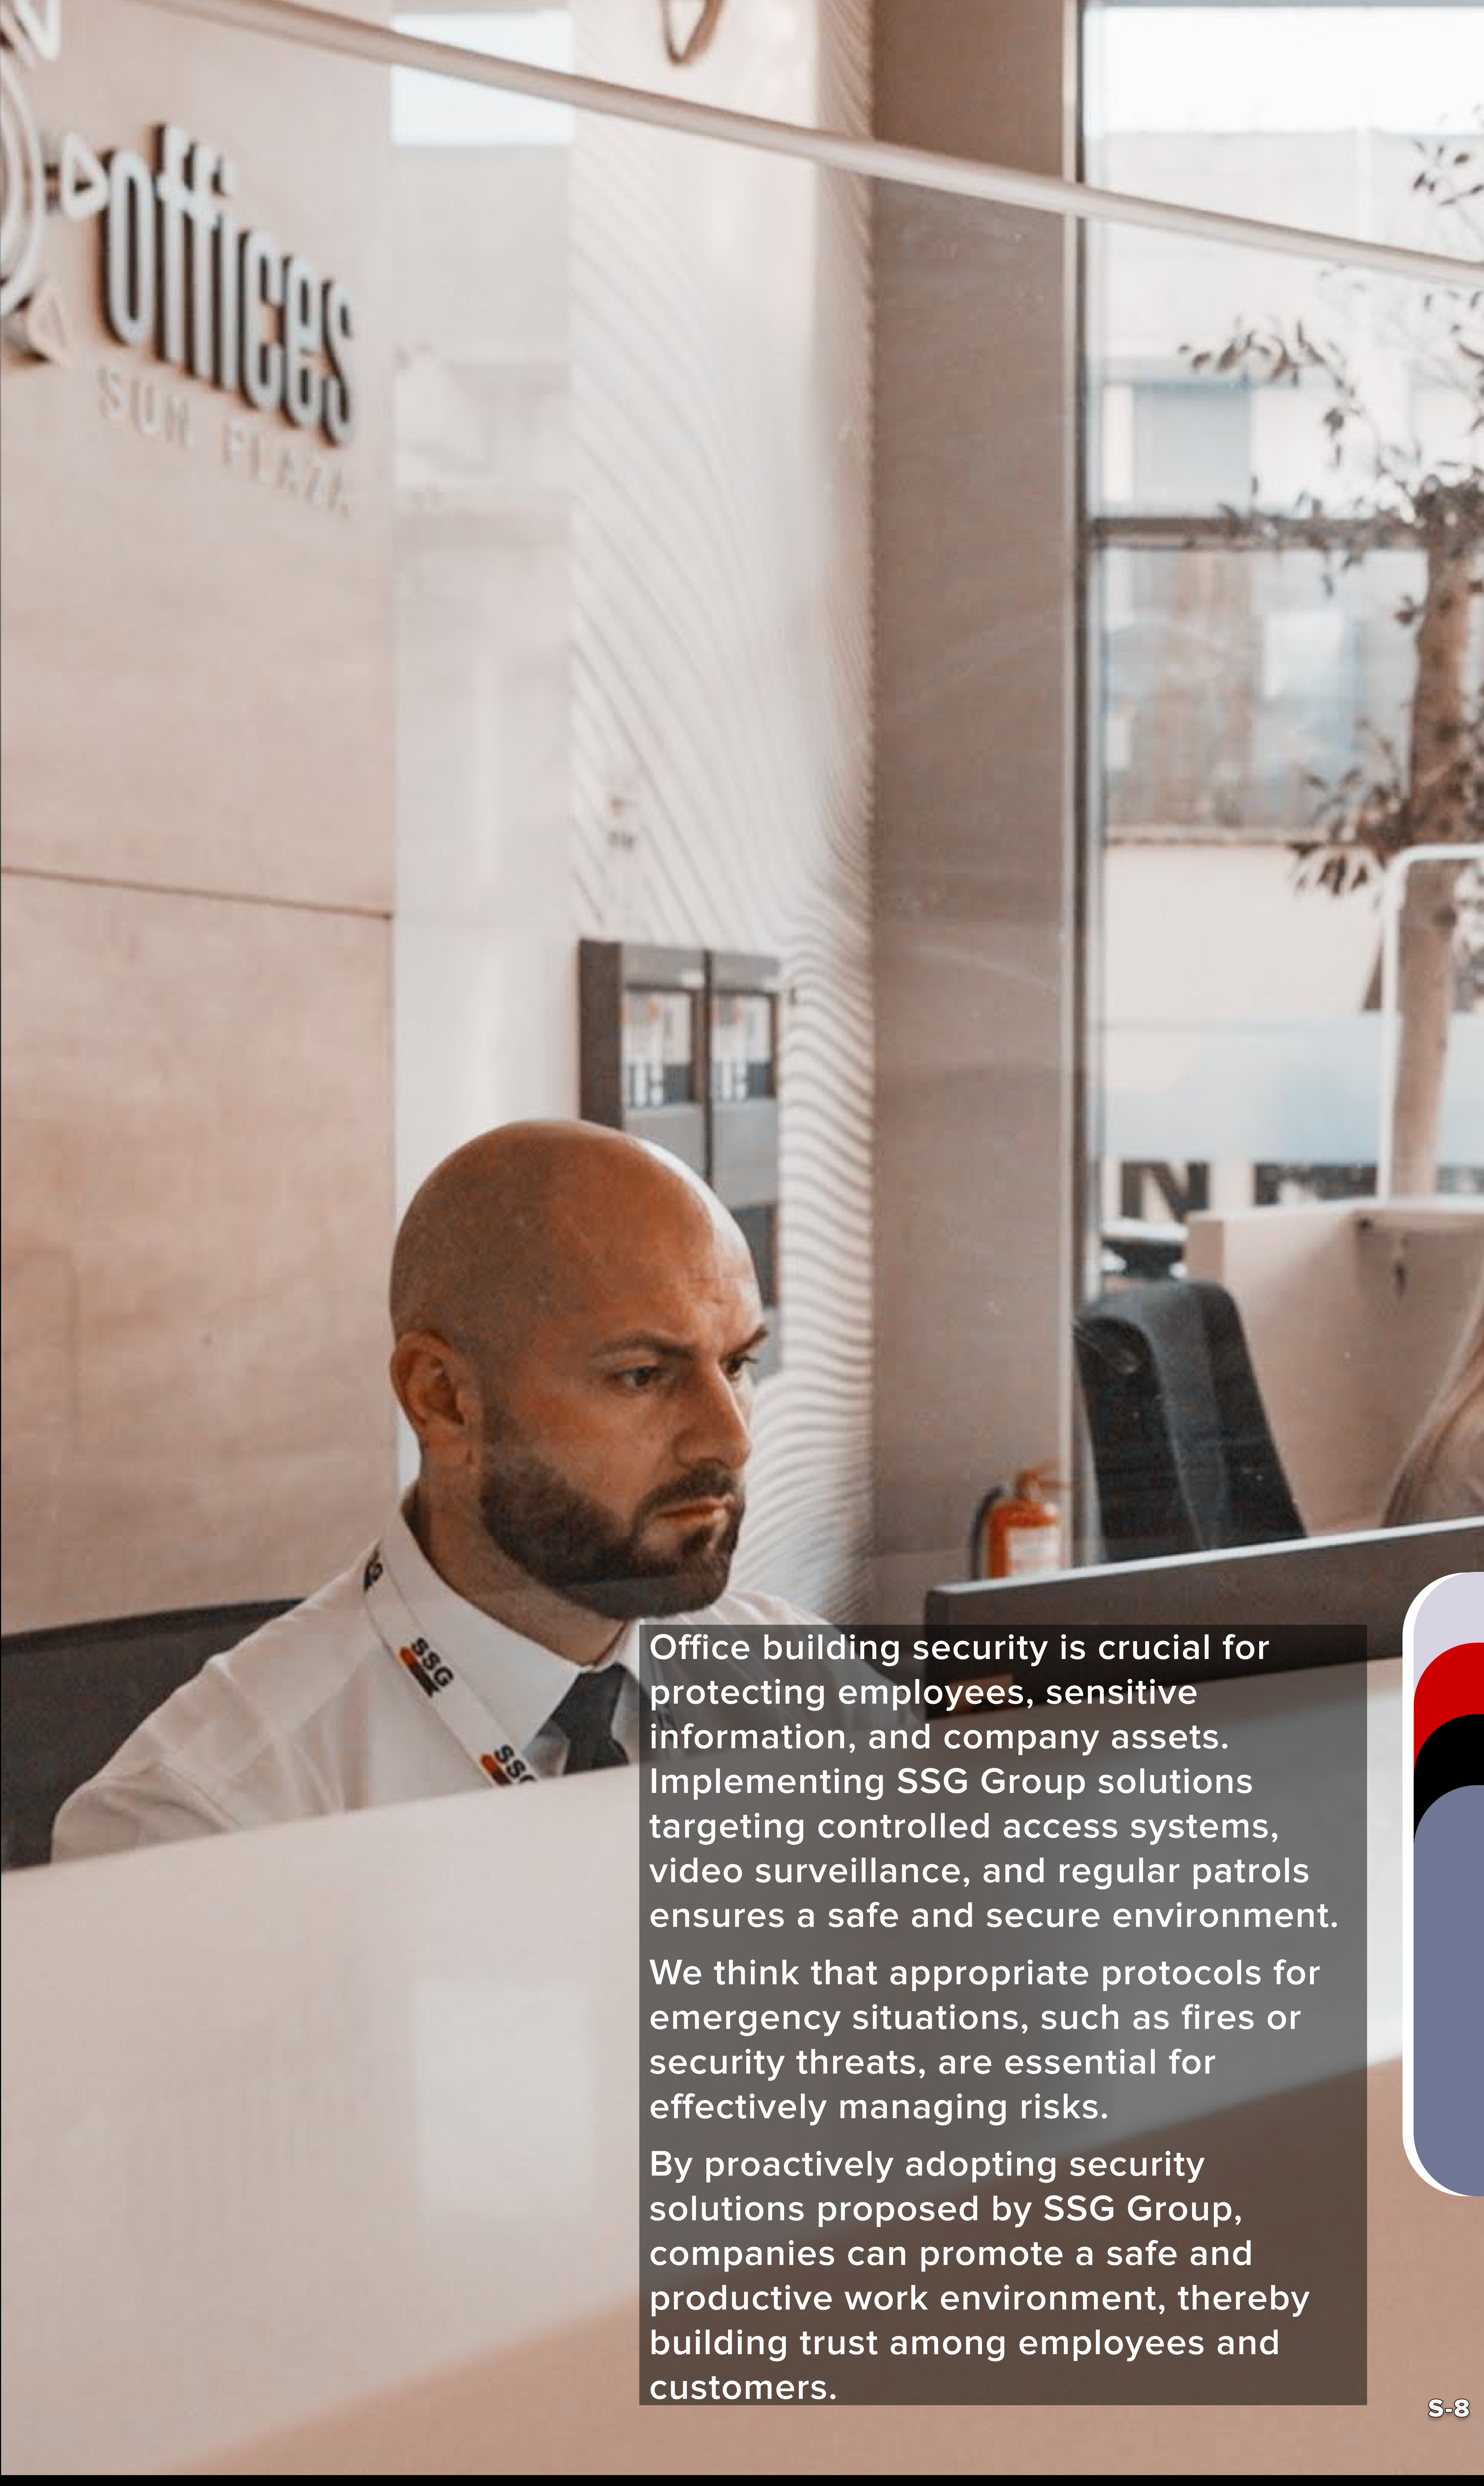

We can discuss several common dimensions of the security activity (e.g. access control function, the basis of the security guard's activity), but, as a specific element of SSG Group, in our activity we always choose to consider the elements that characterize each client.

The technical security solutions proposed by our specialists are designed to support the SSG security agents and ensure the fulfilment of specific missions, anywhere and anytime.

From electronic registers to tour-guard systems developed with SSG Group software, scanner-ID for accurate document registration and data storage compliant with GDPR requirements, PTT stations for group communication or with the Dispatch Center, CCTV systems with advanced video analysis functions, and perimeter surveillance through drones equipped with thermal imaging cameras that can be remotely controlled—these are all resources through which SSG Group's Security Operations Center operates 24/7, 7 days a week.

The mobile component of security at site level is ensured through intervention teams composed of SSG Group agents. These teams have extensive experience, are properly equipped, and operate with high-performance vehicles.

OFFICE BUILDING

Office building security is crucial for protecting employees, sensitive information, and company assets. Implementing SSG Group solutions targeting controlled access systems, video surveillance, and regular patrols ensures a safe and secure environment.

We think that appropriate protocols for emergency situations, such as fires or security threats, are essential for effectively managing risks.

By proactively adopting security solutions proposed by SSG Group, companies can promote a safe and productive work environment, thereby building trust among employees and customers.

VIP

In the philosophy of SSG Group, the security of VIP personalities is essential for protecting their lives and integrity.

SSG Group's specialized VIP protection teams provide high-quality services, including continuous surveillance, threat analysis, and personal escort. These measures ensure a high level of safety in everything from public events to international travel.

The security protocol is tailored to the individual needs and preferences, ensuring the confidentiality and comfort of the VIP.

By implementing rigorous standards and using modern technologies, SSG Group ensures efficient and discreet protection, providing VIP personalities with the necessary comfort to perform their activities optimally.

EVENTS

SSG Group is responsible for planning and implementing security measures at various public and private events.

Its team handles the assessment of specific risks for each event and develops a detailed security plan, including crowd management, perimeter surveillance, and coordination with local authorities.

This department ensures a safe and protected environment for participants and contributes to the success and smooth running of the event itself.

FAST INTERVENTION

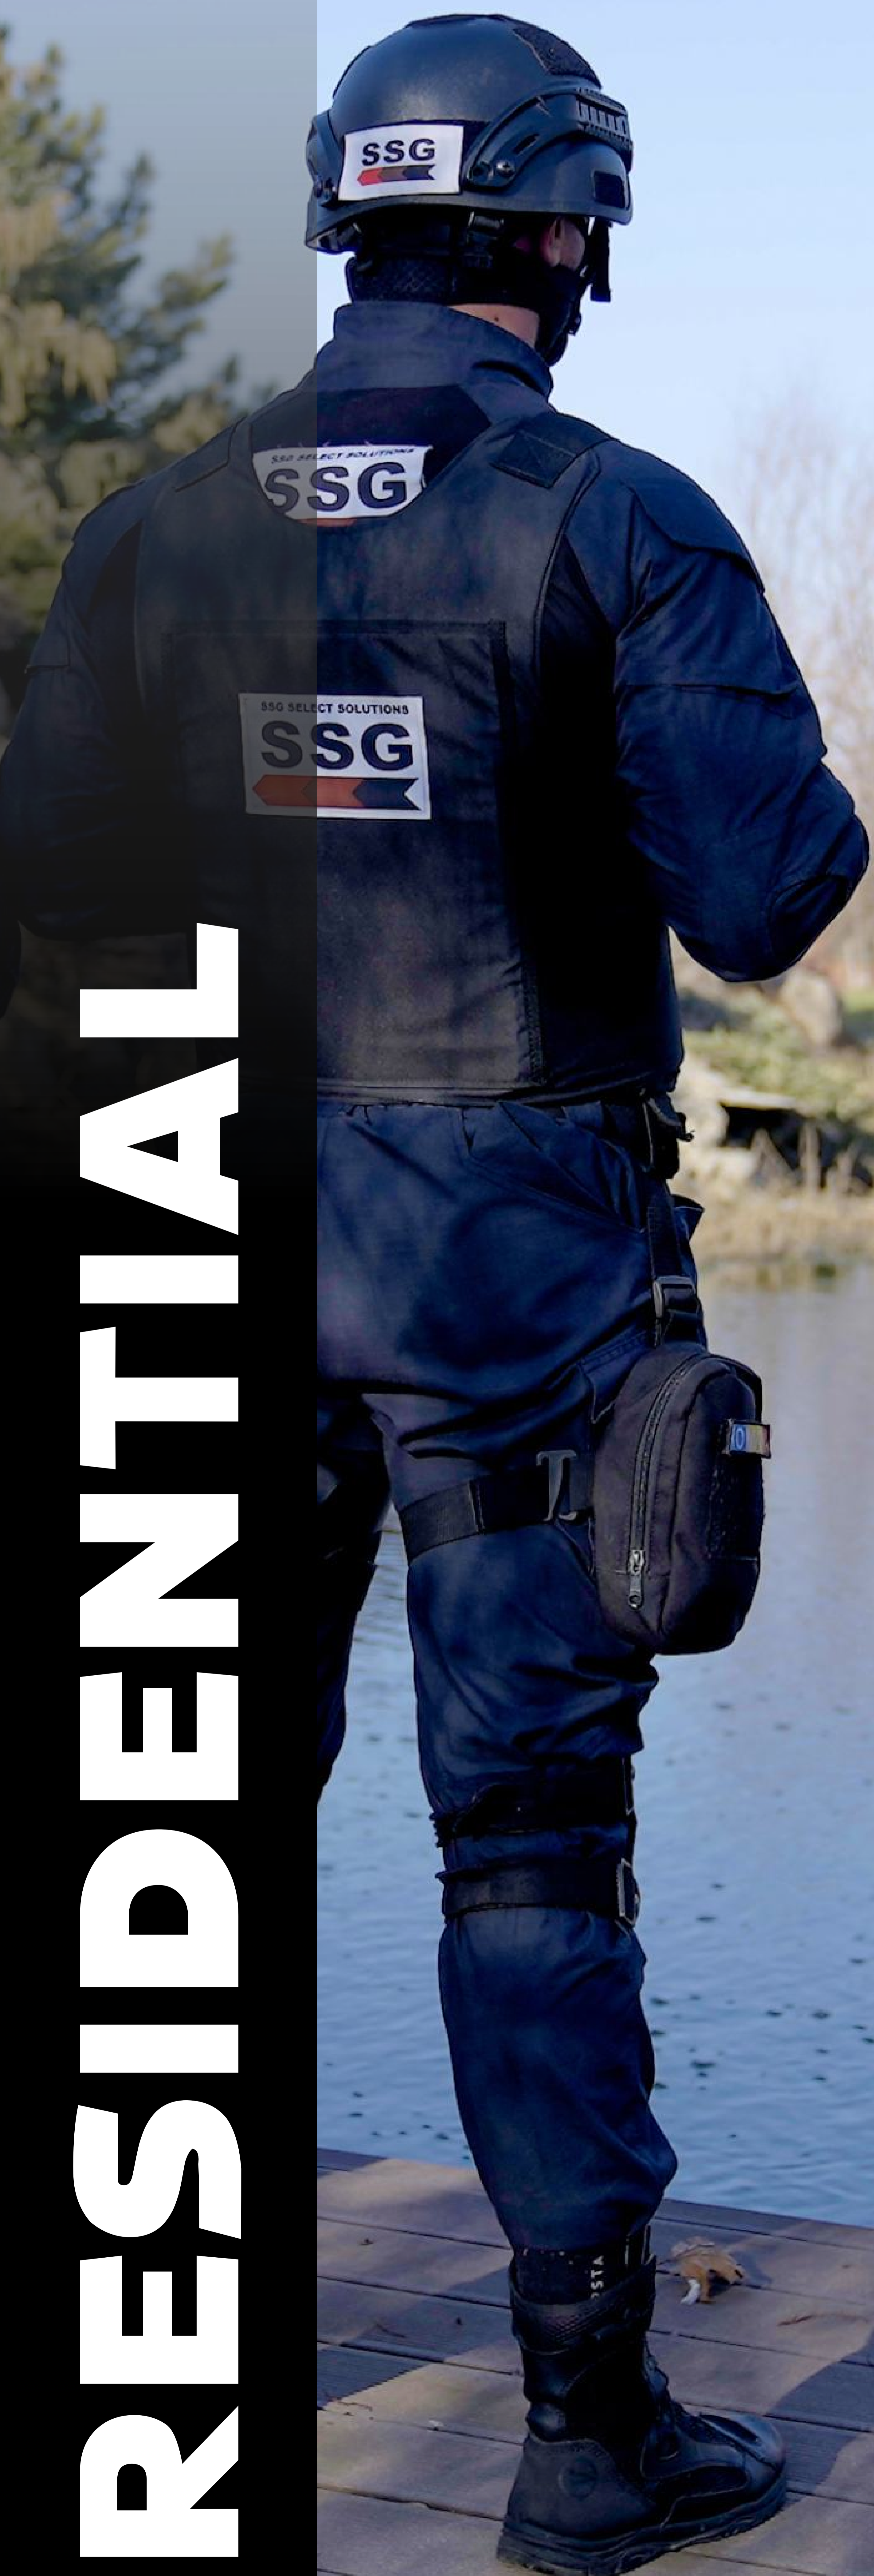

SSG Group's rapid intervention team is a crucial element of security, responding promptly to emergency situations or threats.

Equipped with advanced technology and trained in intervention tactics, this team responds swiftly to incidents such as intrusions, fire alarms, or other threats.

Members of this team are prepared to handle crisis situations with professionalism and efficiency, ensuring the safety of personnel and assets.

Regular training and close coordination among all competent structures make SSG Group's rapid intervention team an elite unit in ensuring the security and well-being of partners.

RESIDENTIAL

By employing the latest security technologies and equipment, along with personalized services and high-quality technical support, the residential sector aims to provide a comprehensive and efficient solution for protecting residential homes. Thus, families can live safely and peacefully, with confidence that their property and loved ones are properly protected.

SSG Group focuses on this segment and provides innovative and personalized solutions for protecting homes against potential threats.

One of the main concerns of the residential division is to provide advanced security systems tailored to the needs and preferences of each client. These systems can include video surveillance cameras, motion detectors, entry sensors, and security alarms, all integrated into a comprehensive and user-friendly solution.

Moreover, the team of specialized consultants and technicians provides expertise and assistance in assessing security risks, as well as in the installation and personalized configuration of systems. Professional 24/7 monitoring ensures a swift response to alarms, enhancing the level of safety and trust among clients.

TECHNICAL

Technology plays a crucial role in the dynamics of SSG Group's operations, enhancing efficiency and the ability to respond rapidly to threats.

The specialized software developed and optimized by our specialists for managing operations and analyzing data contributes to making informed decisions. Additionally, emerging technologies such as artificial intelligence and predictive data analysis improve the ability to anticipate risks and plan security strategies.

We can provide both technical systems in various technologies and consultancy services to guide clients in choosing the best solution that addresses their issues while considering budget constraints.

SSG utilizes and recommends cost-effective security optimization by combining CCTV solutions with management from SSG's SOC (Security Operations Center) and on-site security agents.

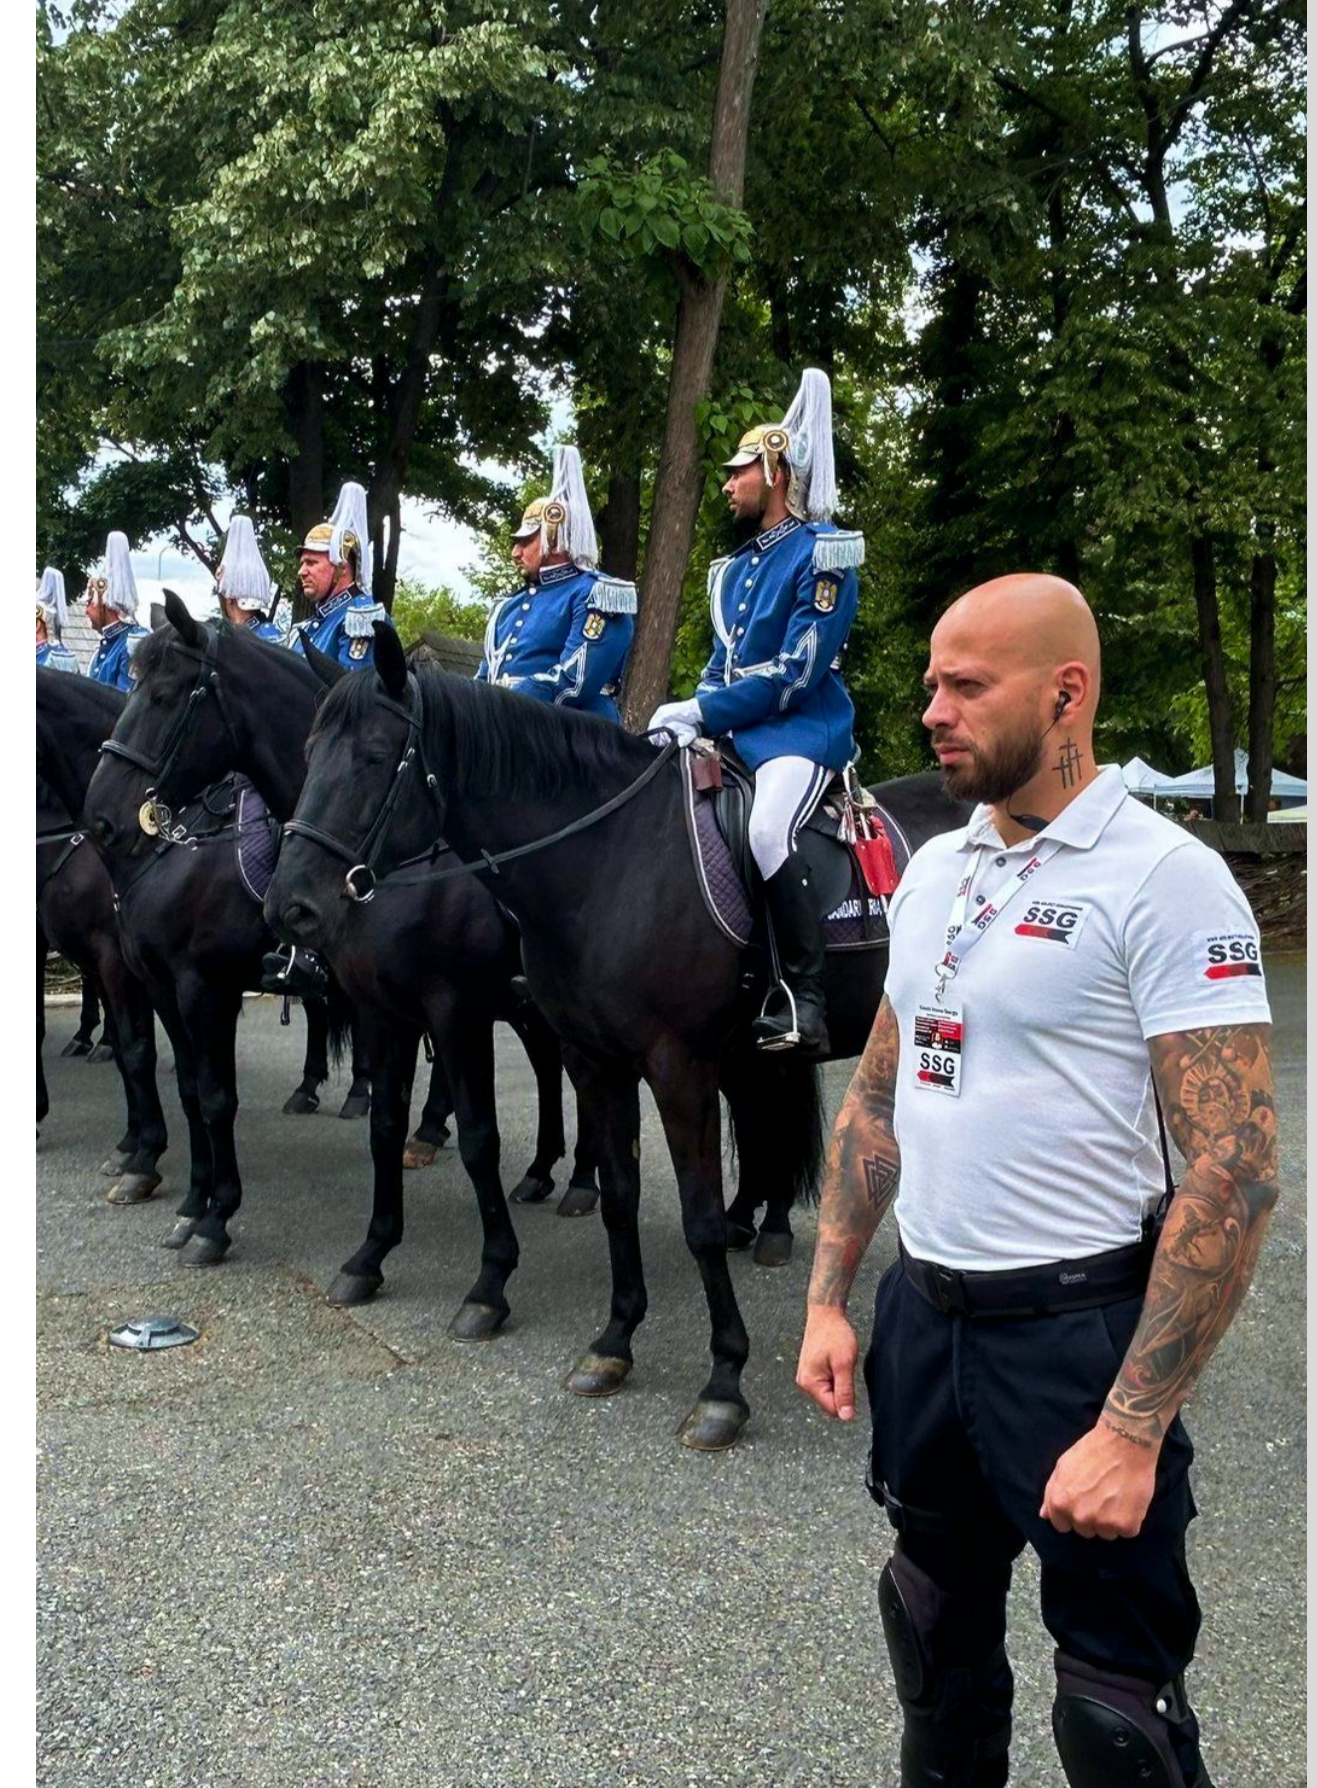

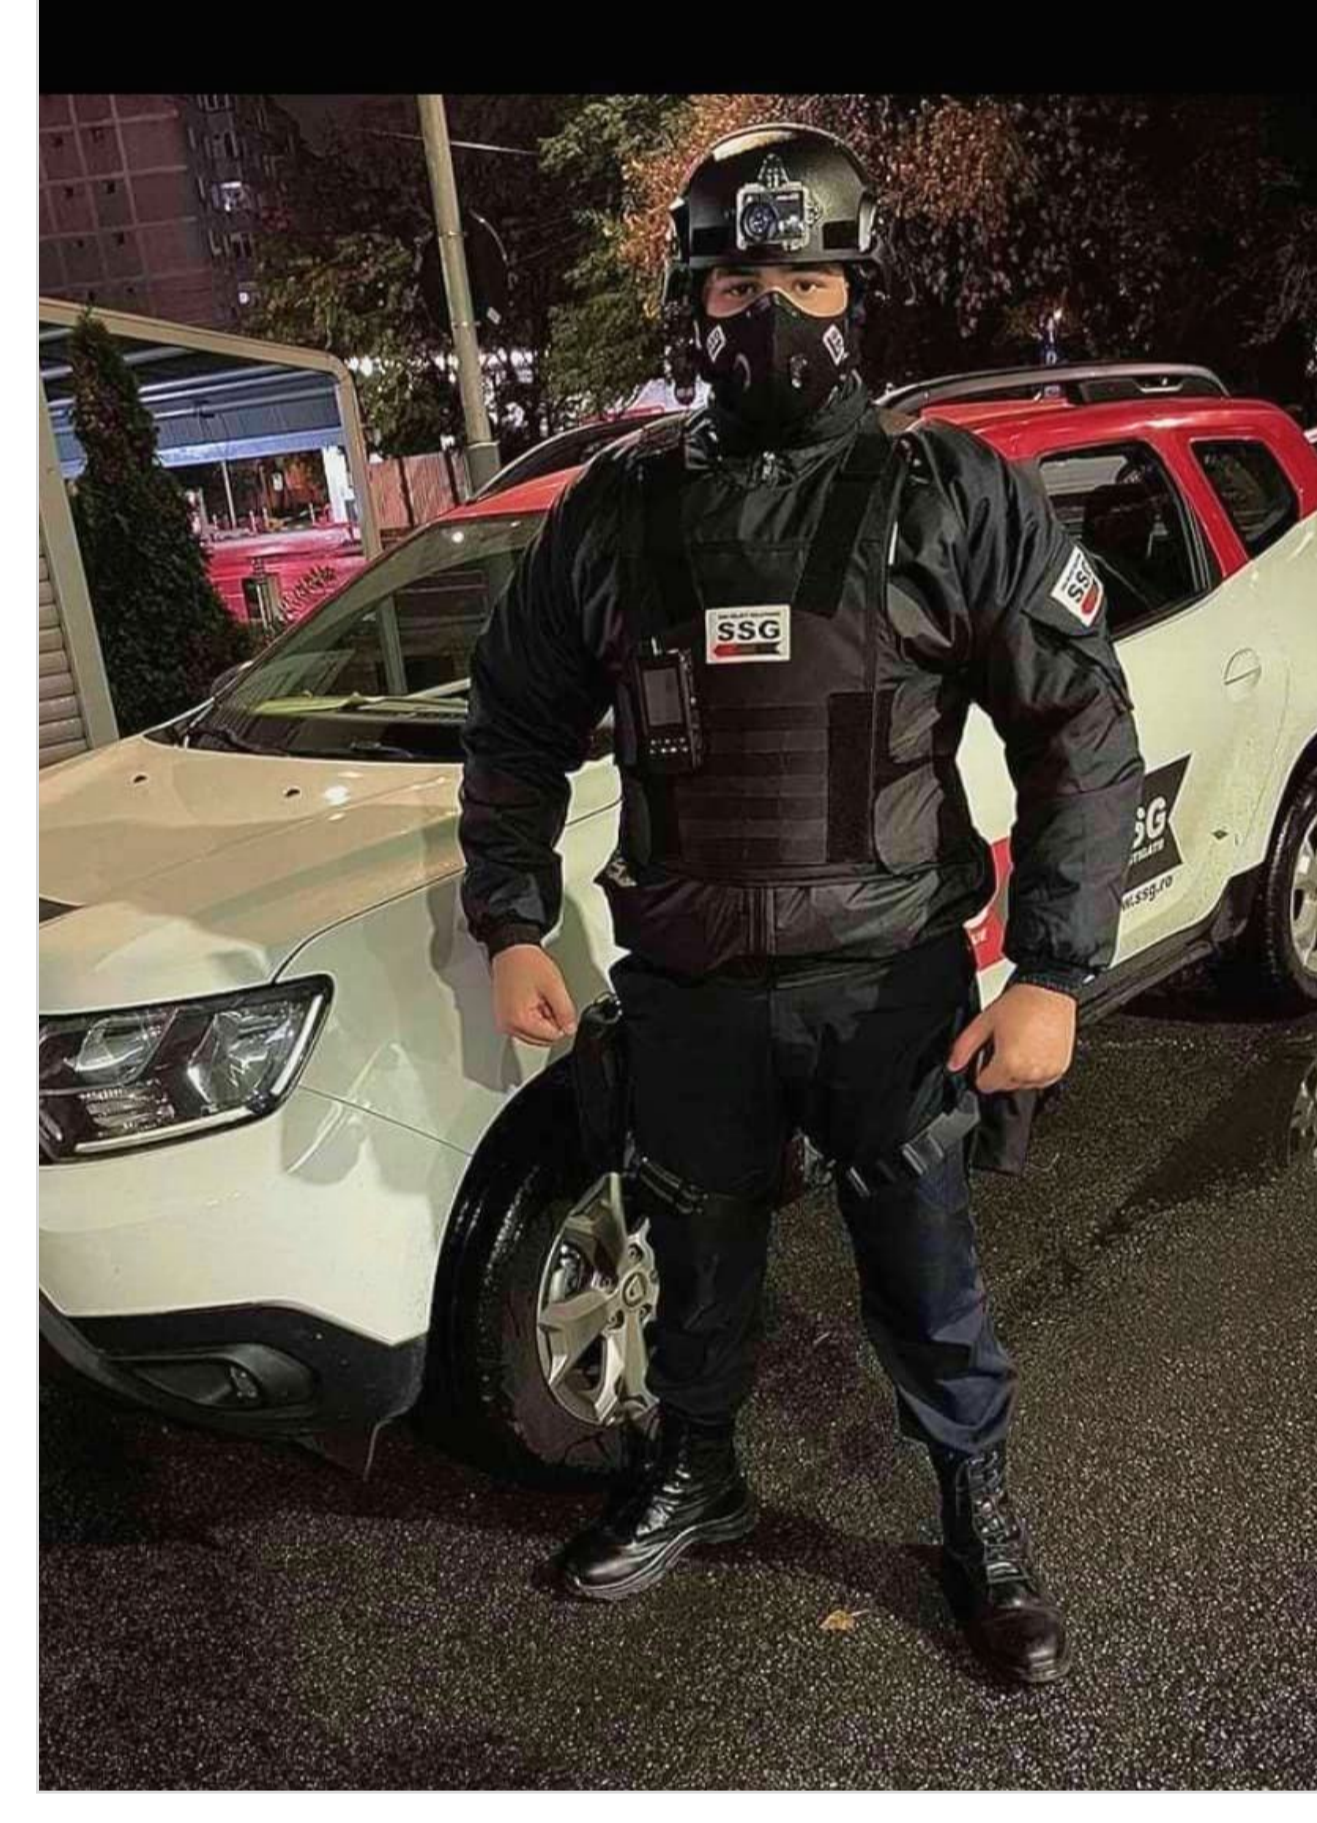

CONSULTANCY

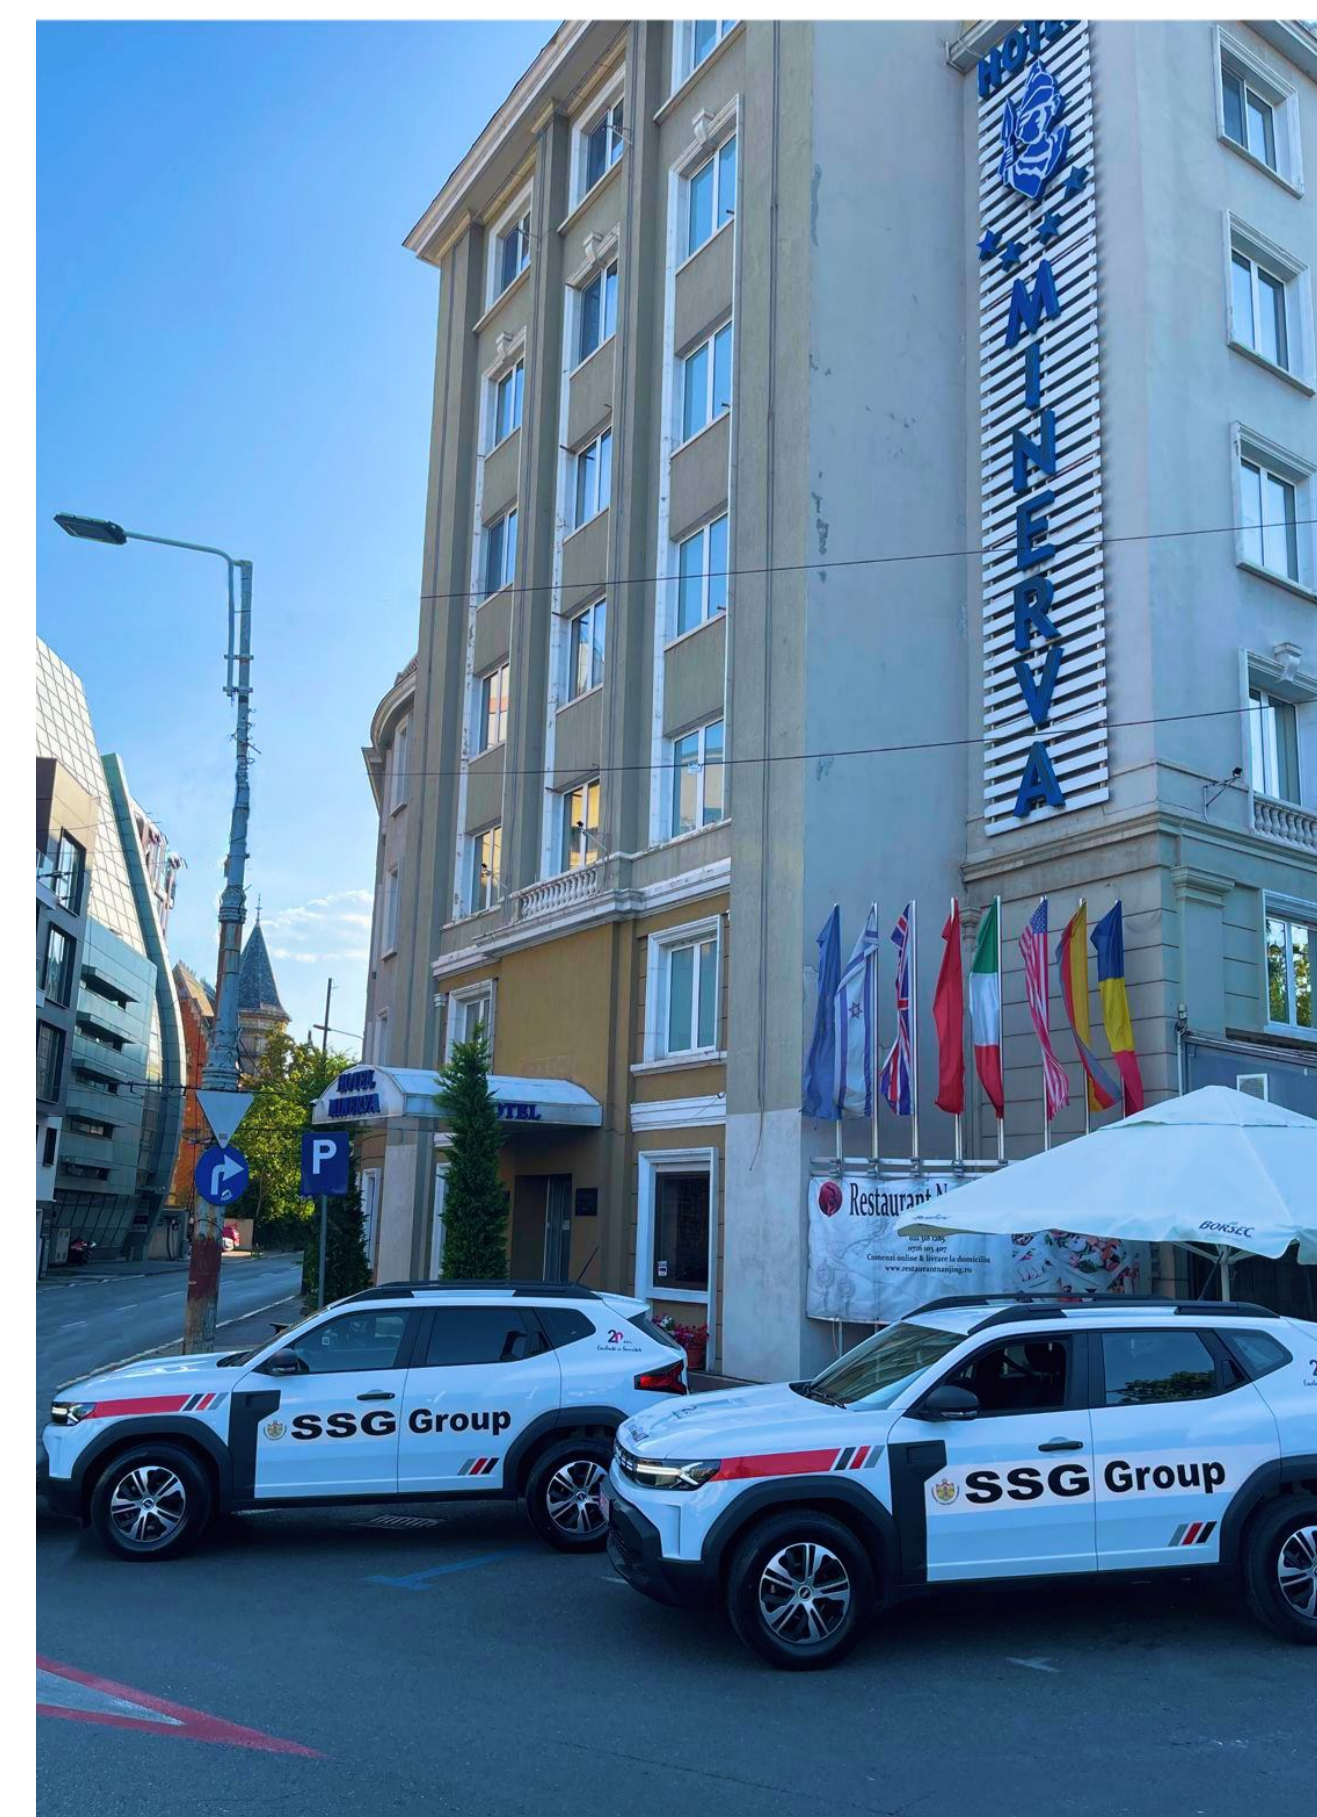

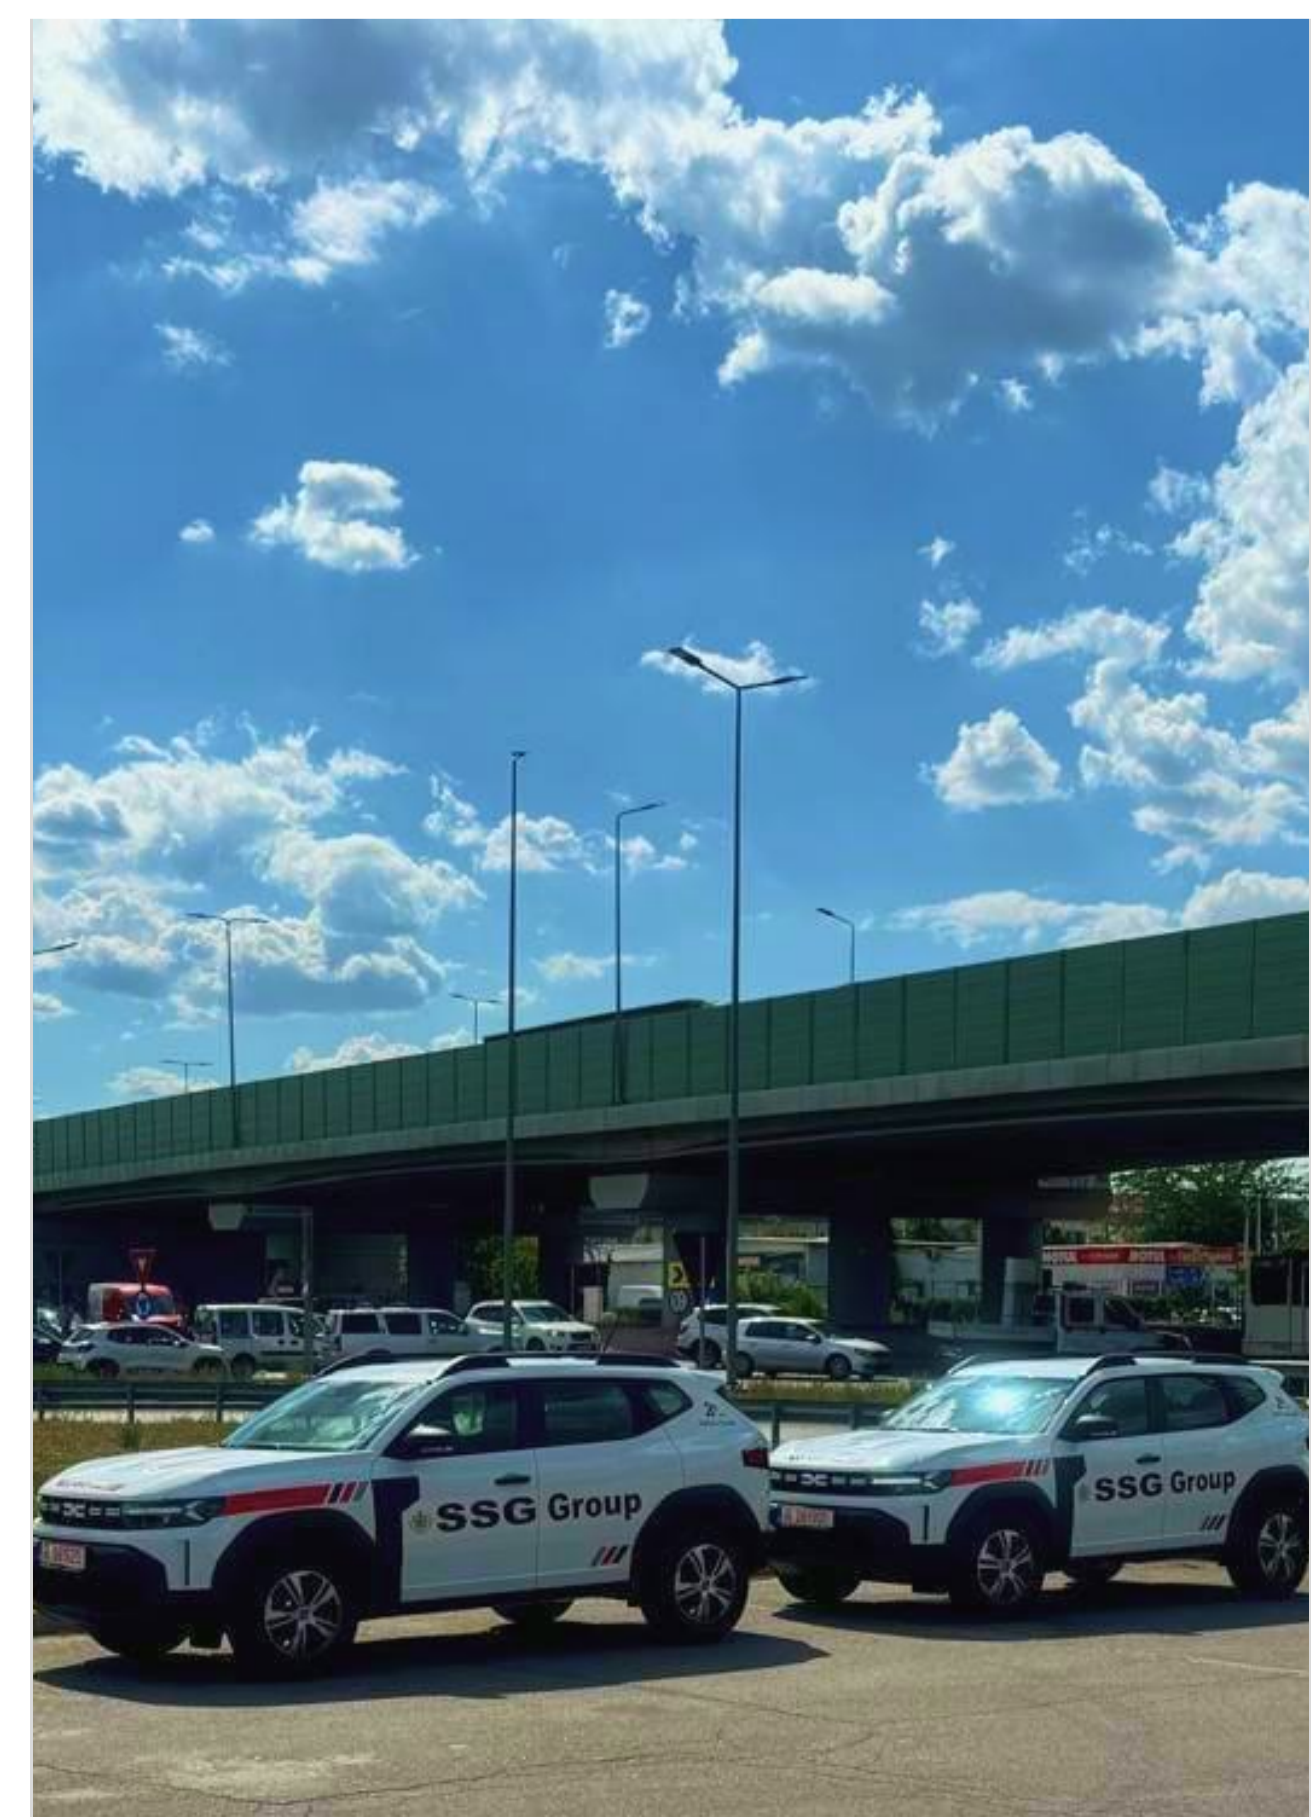

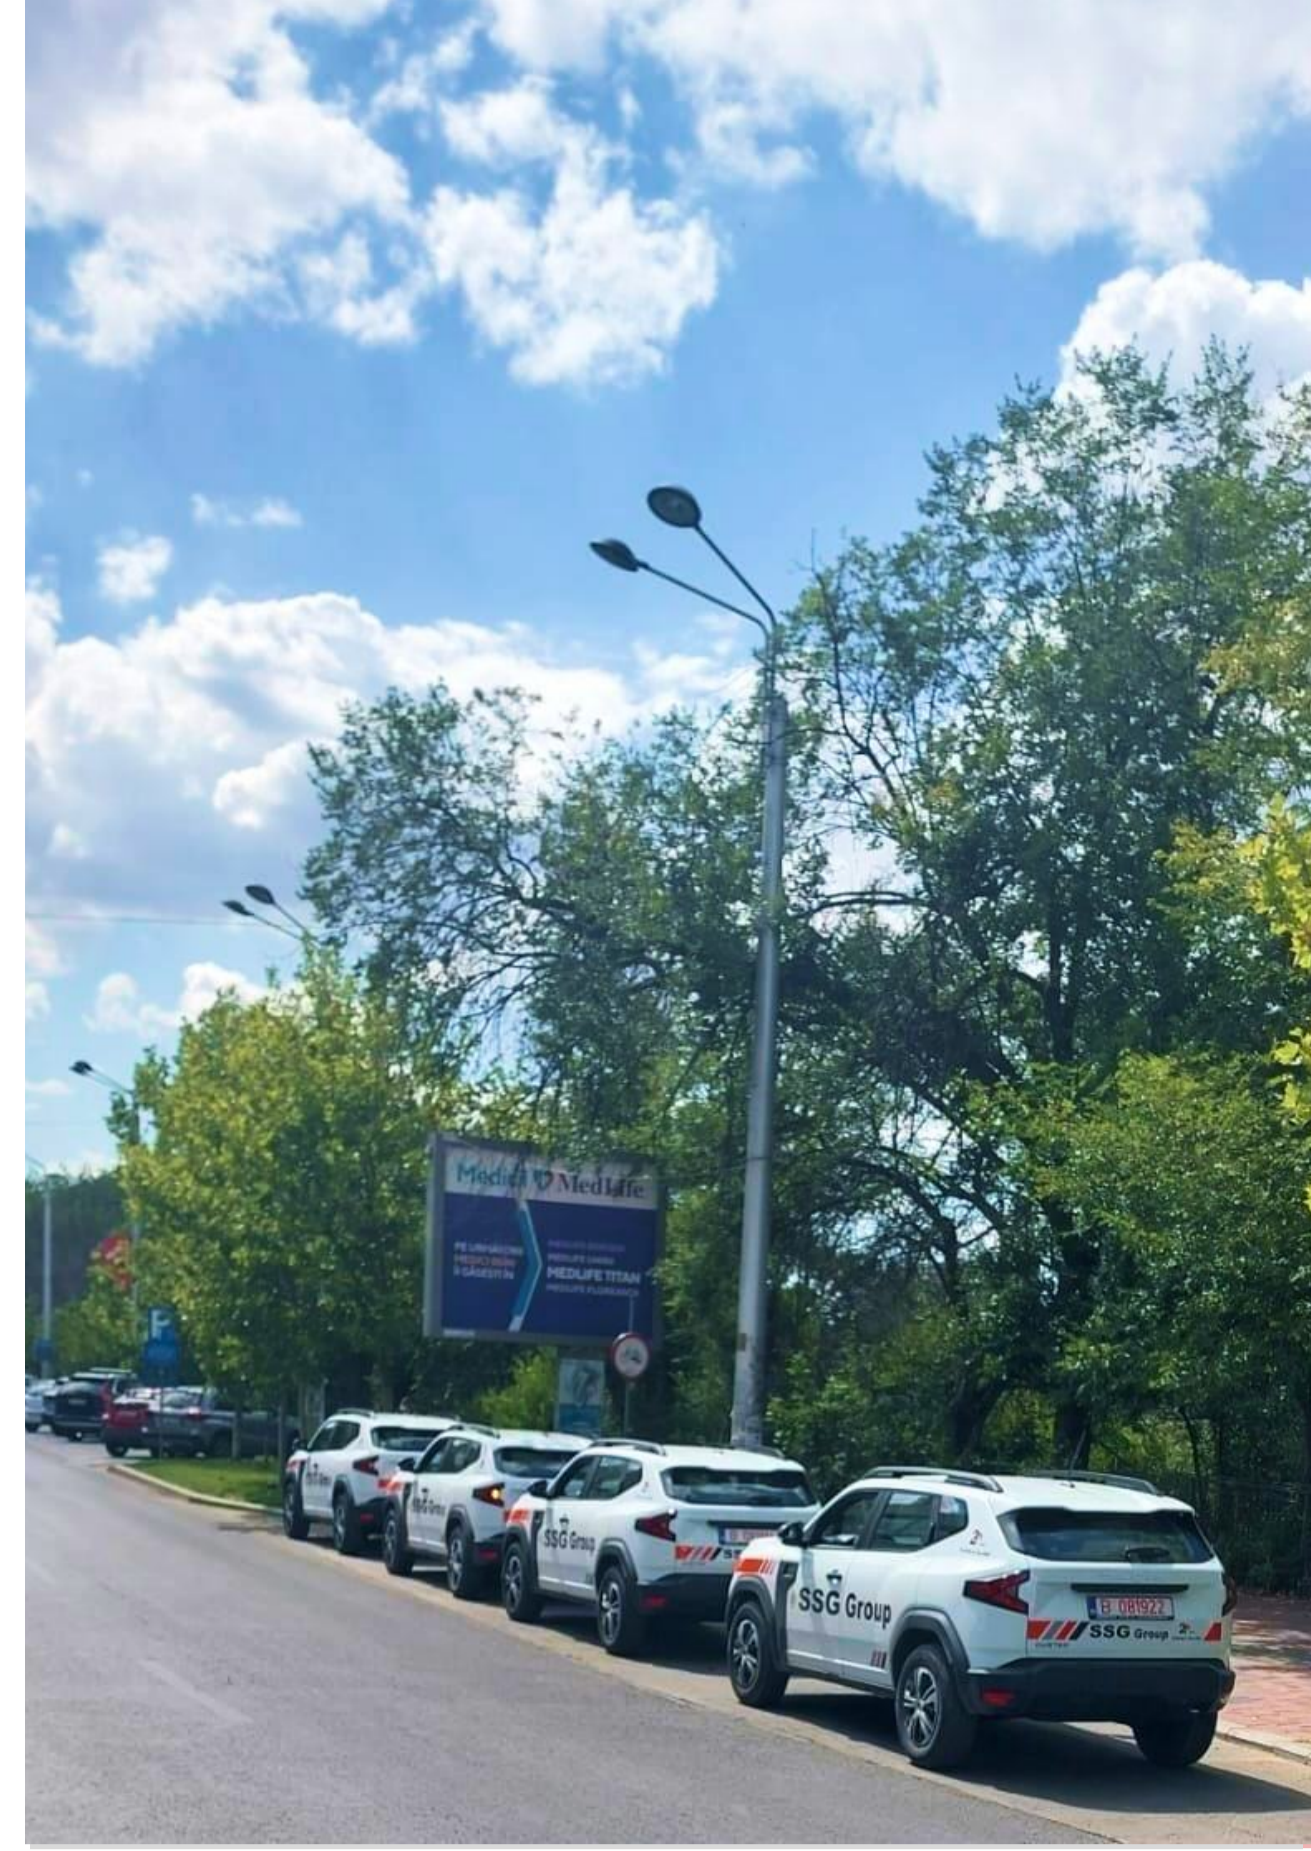

SSG Group approaches the area of security consultancy in a phased approach, as follows:

- Identifying risks from threats and vulnerabilities.
- Calibration risks according to the specifics of each client.
- Proposing technical solutions.
- Accompanying technical solutions with the corresponding operational procedures, implemented either by the client's own personnel or by SSG staff.
- Choosing the right technologies, both for the purposes pursued and within the budgets set.
- Designing technical solutions accordingly.
- Implementation and commissioning of security solutions.
- Implementing and commissioning security solutions.
- Ensuring prevention and corrective maintenance.
- Continuous adaptation of solutions based on incidents.

We have national coverage and a working method that involves not only completing service logs but also auditing objectives upon takeover, gathering all information into an objective file, so that we can provide the client with any information they may need at any time.

Drones

The UAV (Unmanned Aerial Vehicle) Department represents a key element of SSG Group's capability to provide efficient surveillance and intervention services.

The use of drones in the security field brings several advantages and significantly contributes to improving performance and operational outcomes.

Due to their flight capabilities and advanced surveillance and data recording equipment, drones can rapidly and efficiently cover extensive areas, allowing real-time monitoring of activities and identification of potential threats or risks.

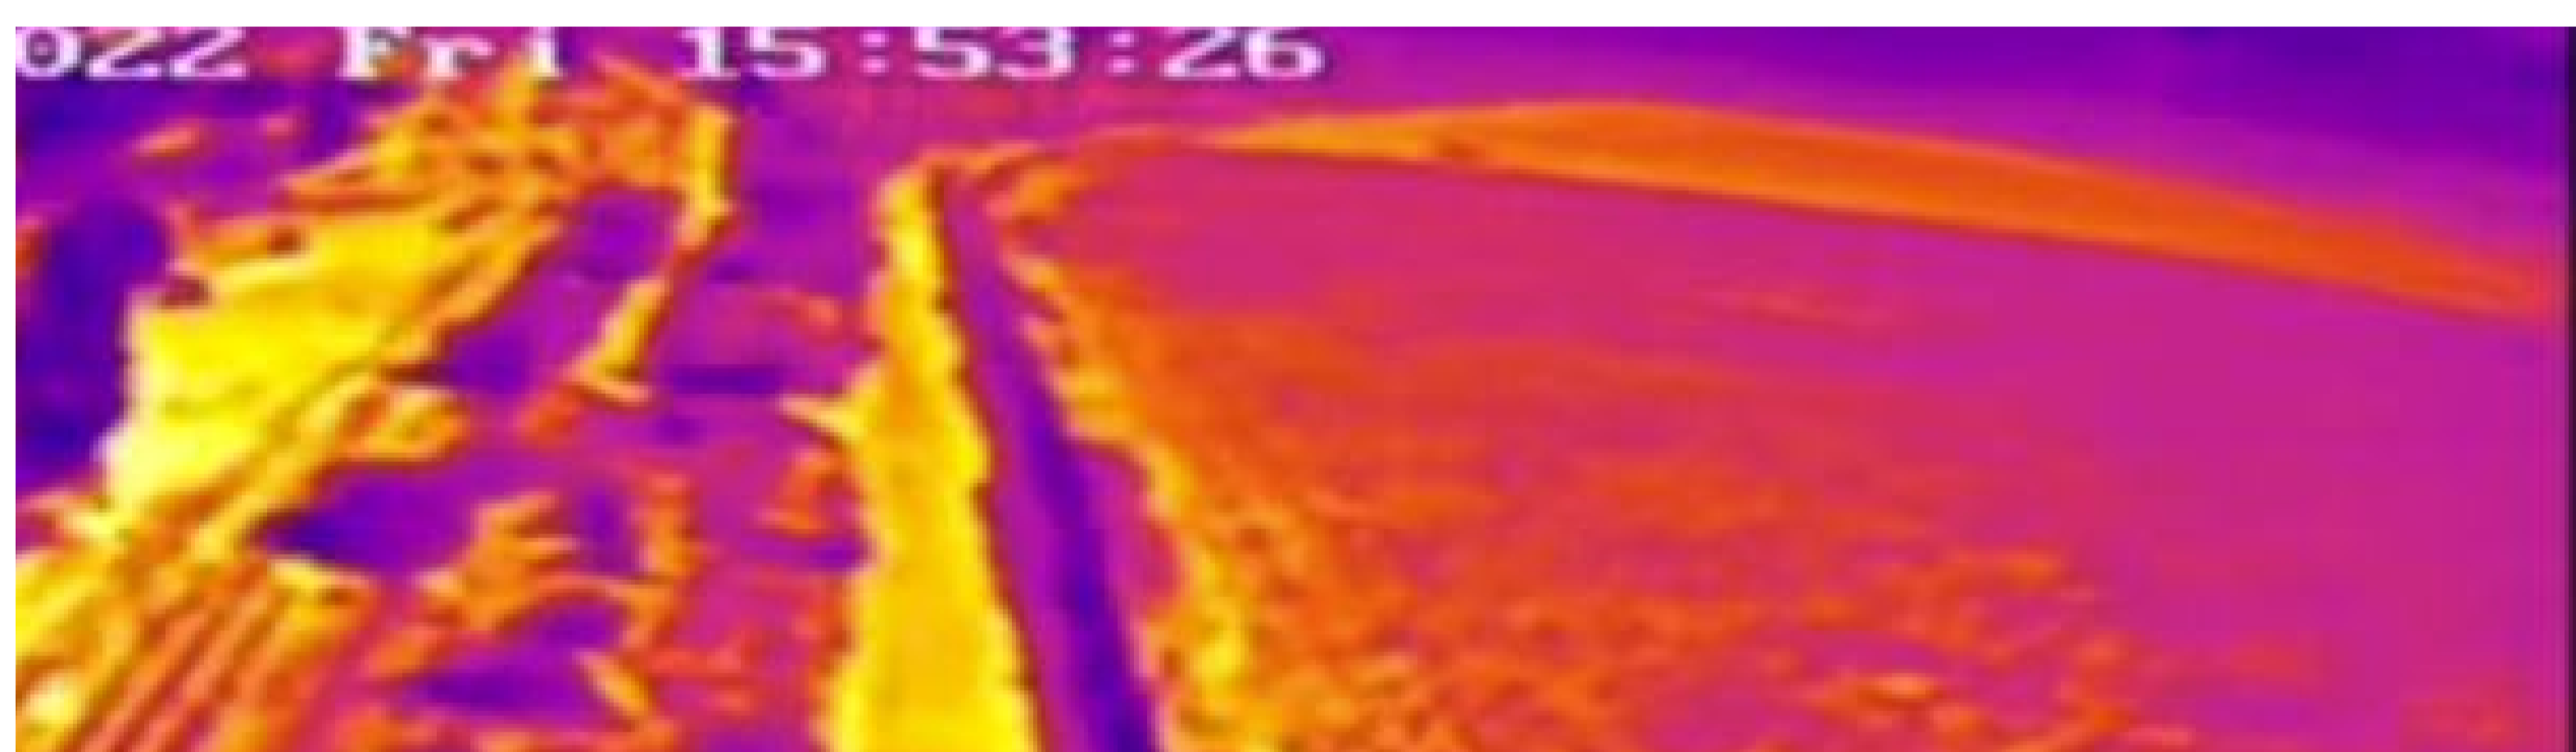

In addition, the use of drones in security operations reduces risks to human personnel. Drones can be deployed to conduct surveillance missions in dangerous areas or crisis situations, without unnecessarily exposing the lives of security agents to risks. This aspect is particularly crucial in emergency situations or in areas with difficult access, where human intervention can be limited or dangerous.

The UAV Department represents a critical element of SSG Group's operational capability, bringing significant benefits in terms of surveillance, intervention, and protection.

By using drones, SSG Group teams have significantly enhanced their ability to respond to threats and ensure a safe and secure environment for all our beneficiaries and partners.

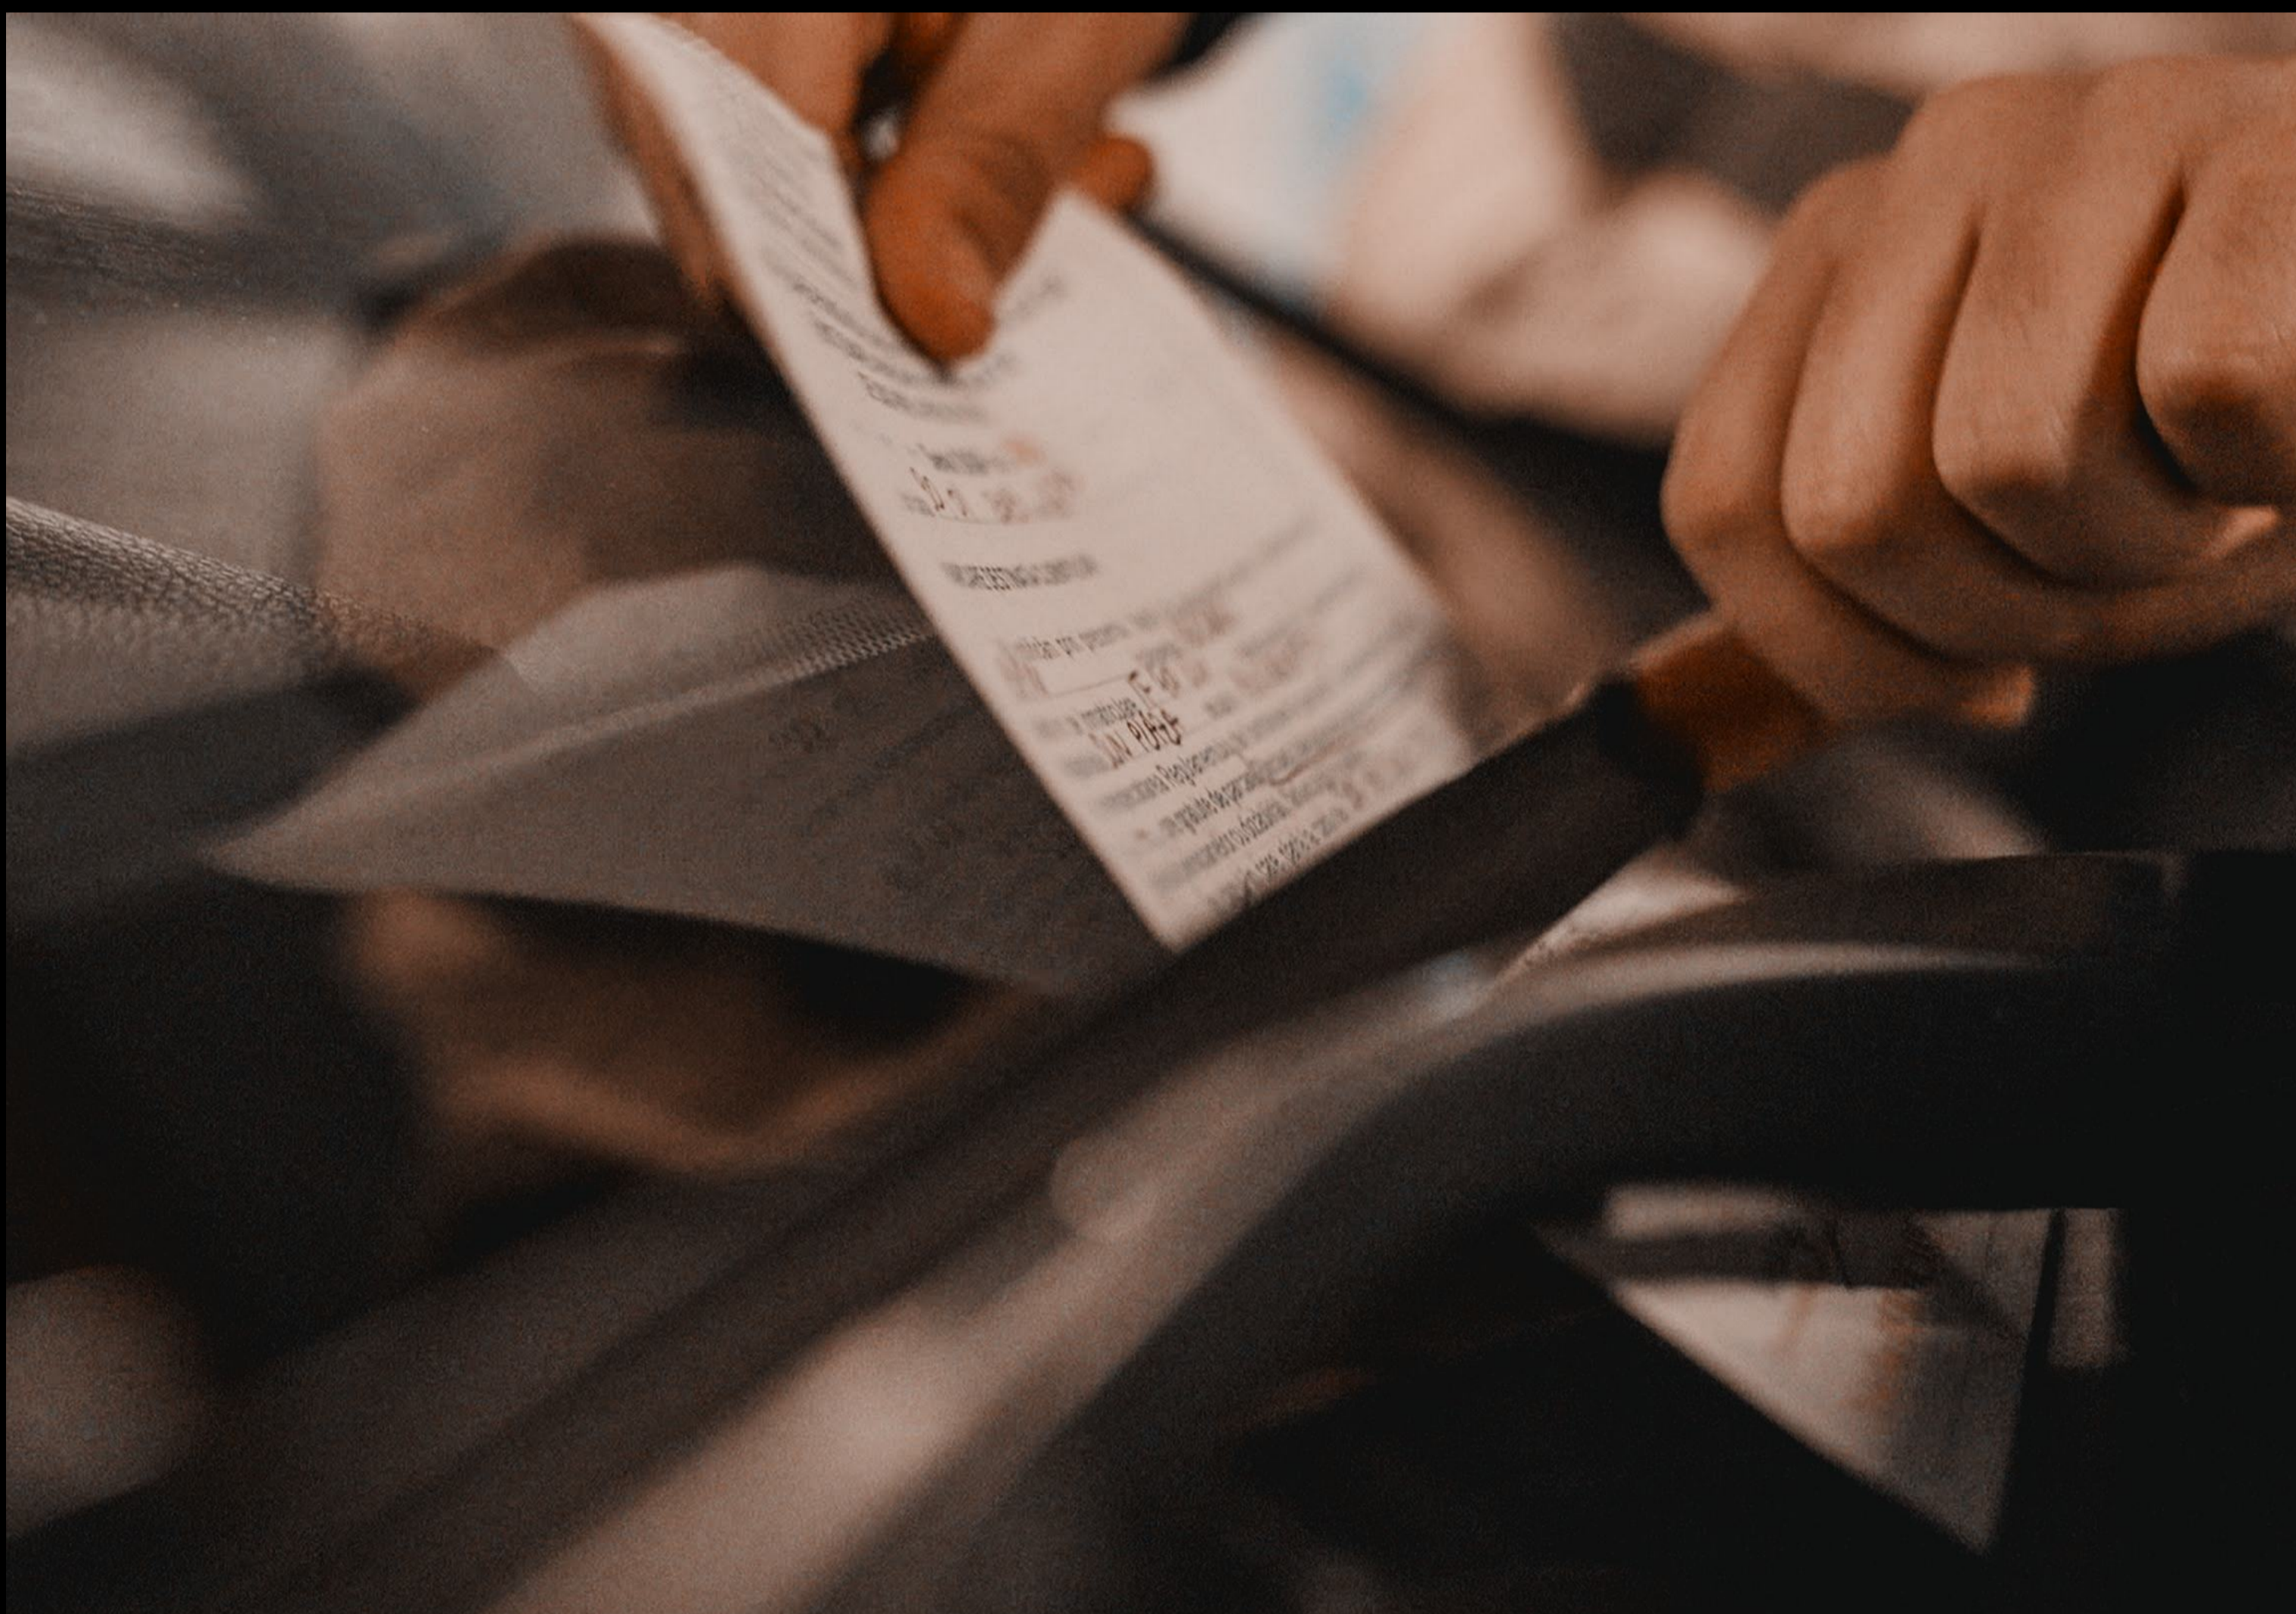

DRONES

Parking Place Management

At SSG Group, we are proud to present our innovative new service for Parking Management, designed to address the parking challenges faced by businesses, particularly in the retail industry. Our comprehensive solution enables companies to efficiently manage their parking facilities, ensuring that parking spaces are reserved for genuine customers and preventing abuse by non-customers.

By implementing advanced parking management techniques, we help companies optimize their parking resources, enhance customer satisfaction, and maximize revenue potential.

Key features of our Parking Management service include:

- **Strategic planning:** We work closely with companies to develop personalized parking management strategies tailored to their unique operational needs and requirements. Our team conducts detailed evaluations to identify parking patterns, analyse utilization rates, and develop optimal parking allocation plans.
- **Technological integration:** By utilizing modern parking management technologies, including automated license plate recognition systems, parking occupancy sensors, and mobile applications, we streamline parking operations and enhance efficiency. Our advanced systems allow real-time monitoring of parking availability, seamless enforcement of parking policies, and easy access for customers.

- **Application and conformity:** Our dedicated team of specialized agents ensures strict adherence to parking regulations and policies, discouraging unauthorized parking and enforcing penalties for rule violations. Through patrols and proactive enforcement measures, we maintain order and fairness in parking facilities, creating a positive experience for customers and minimizing disruptions.
- **Data analysis and reporting:** We provide comprehensive data analysis and reporting tools to track parking usage trends, measure performance metrics, and generate actionable insights for continuous improvement.

Our detailed reports enable businesses to make informed decisions, optimize resource allocation, and drive operational efficiency.

- **Excellence in customer service:** We prioritize customer satisfaction at every touchpoint, providing responsive support and assistance to address inquiries, resolve issues, and ensure a seamless parking experience for visitors. Our proactive approach to customer service promotes loyalty, trust and positive brand perception among customers.

With our Parking Management service at SSG Group, companies can efficiently manage their parking facilities, improve operational efficiency, and enhance overall customer experience.
